

# NAUTILUS FLOATS

FOR PIPE, HOSE OR CABLE

*With GripTite™ Technology*

[www.nautilusfloats.com](http://www.nautilusfloats.com)

*Patent Pending*

**Kevin, Project Manager - Callan Marine reports:**  
“Dredge Captains love them - they do not move at all on the pipe, or rotate. Hydrodynamically, the floats are fantastic. When the dredge moves from place to place in the course of it’s work, the floats stay in position.”

# Features

Tongue and groove profile locks assembly together.

Tapered nose design reduces drag on float.

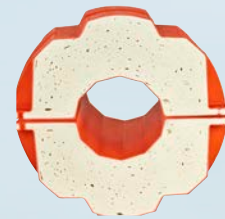

Corner bolt pattern secures floats tightly to the pipe.

Top ribs allow floats to be stacked for storage or shipment.

Patent Pending

Configuration of the inner core is a multi-faceted gripping surface that channels fluids between the pipe and float providing more contact area to a pipe than standard designs. No rubber inserts or gaskets necessary.

The Nautilus family of floats can be used foam filled or unfoamed for specific applications.

Part No.	Pipe Size inches (mm)	Overall Dia. inches (mm)	Overall Length inches (mm)	Bolts/Set	Weight lbs.(kg)	Flotation Capacity @50% submersion
